System pro E® energy

Beyond connected, always one step ahead of maintenance

- Flexible and scalable solutions for commercial and industrial areas
- Retrofit existing installations within a day
- Connect the system to the cloud in only 10 minutes
- Lower operational costs and improved facility value by 5 %
- Save up to 20 % of energy and reduce CO₂ emissions by 15 %

Designed for commercial and industrial buildings, System pro E® energy sub distribution boards have been developed for simple and flexible configuration and offer 20 % more wiring space, require 30 % less stock and save up to 40 % of assembly time.

System pro E[®] energy

System pro E® energy

Product benefits

05

The new modular and welded solution for wall-mounted and floor-standing distribution boards, up to 800 A

Wall mounted and floor standing sub distribution boards up to 800 A for commercial and industrial requirements.

—
01
System pro E® energy M is the monoblock cabinet with attachable side panels

The comprehensive System pro E® energy range includes wall mounted and floor standing sheets steel cabinets, offering protection degrees against dust and water up to IP43 and IP55.

A common interior fitting and busbars for the complete platform, allows the users to easily integrate all types of ABB low voltage electrical devices, to build distribution panels up to 800A.

The range has been developed for simple and easy configuration and provides maximum flexibility to the panel builder and installer, to build the distribution board for any application. System pro E® energy is simple in planning, quick in assembly and safe in application.

System pro E® energy L is delivered as flat kits while System pro E® energy M is a monoblock cabinet with attachable side panels.

Both versions share the same busbars, functional units, doors, bases and cable flanges, reducing the overall commercial references for the overall pro E® energy platform.

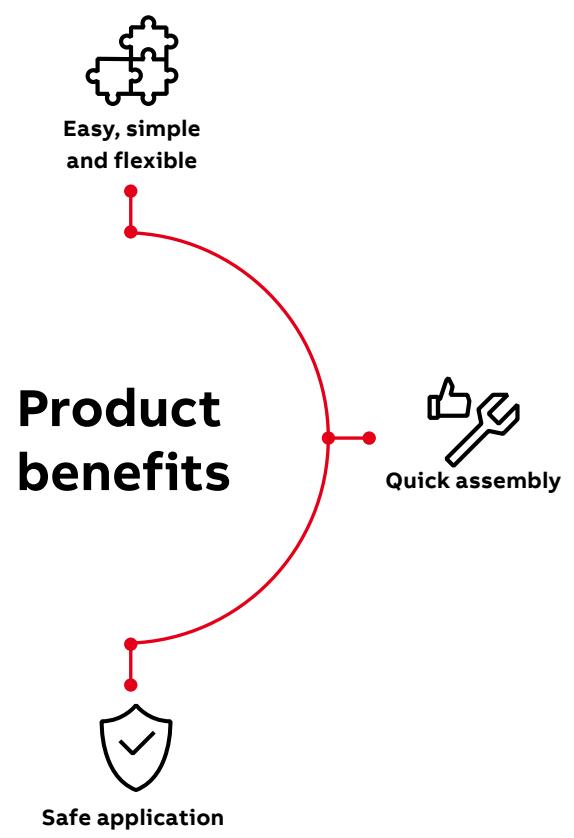

This reduces the number of codes by 15% and 30% less stock is required.

System pro E® energy provides maximum simplifies configuration and saves 40% of assembly time. Several different wiring options and the modular plinth concept increase flexibility significantly.

System pro E® energy introduces several features to reduce the assembly time:

- Click-in supports to fix the mounting plates, DIN-rails, isolators etc. to the cabinets without any screw
- All the cover plates have the 1/4 turn screws already pre-assembled
- Innovative flange technology with tool-free installation
- Door ready to mount
- System pro E® energy L has a reduced number of screws to build the cabinet
- Frame to remove all cover plates at once
- Easy assembly of the base and the horizontal coupling
- Easy accessibility and 20% more wiring space

The combination of the System pro E® energy cabinets and ABB's low voltage devices are certified according the standard IEC 61439-2 / -3 and IEC62208.

System pro E® energy

The complete cabinet system ...

The System pro E® energy range includes two types of cabinets and one internal configuration system.

System pro E® energy L

Tailored and proven wall mounted and floor standing sub distribution boards up to 800 A.

Delivered in flat kits, System pro E® energy L provides a protection degree up to IP43 (IP30 without the door).

System pro E® energy M

Monoblock cabinet with attachable side panels, available in both configurations: wall mounted and floor standing.

System pro E® energy M sub distribution boards provide a protection degree up to IP55 (IP30 without the door).

System pro E® energy Combi

The common internal configuration system facilitates the installation of a wide range of ABB Low Voltage devices based on its modular system, delivered in flat packs.

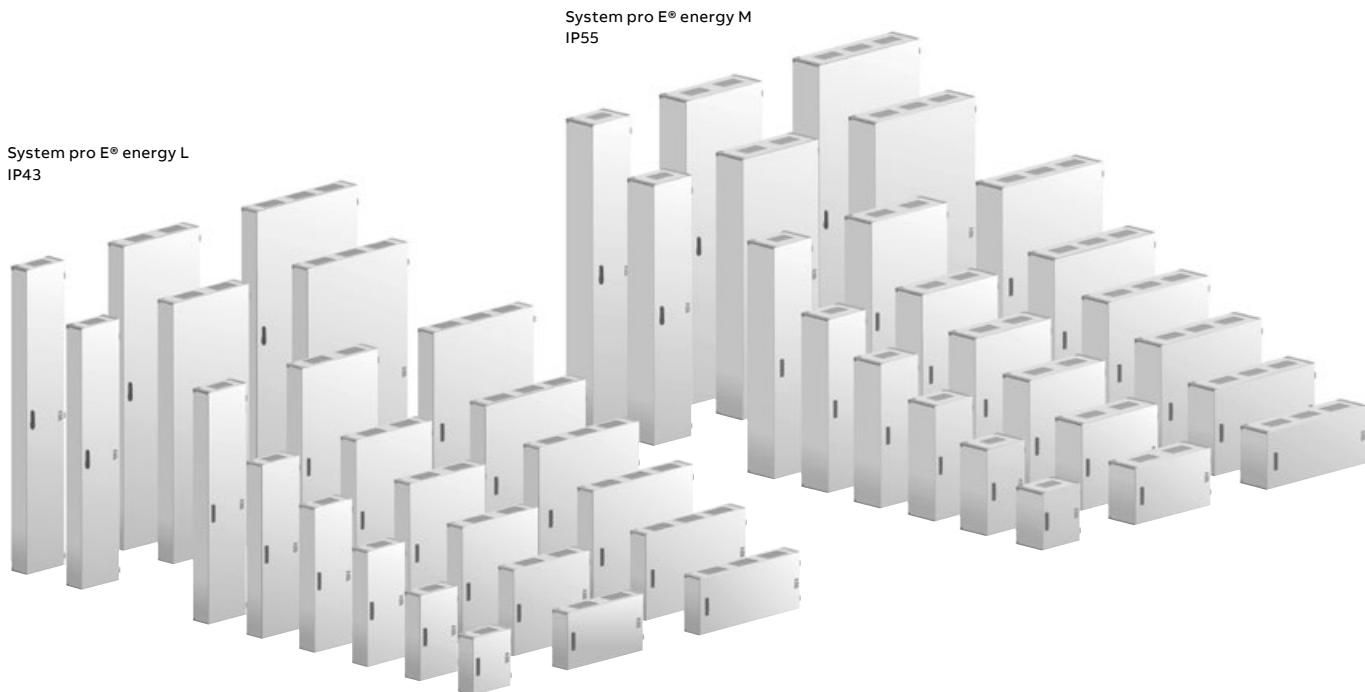

System pro E® energy

> Dimensions in mm

System pro E® energy

Product benefits

Easy, Simple and Flexible

- Cabinets of 400, 600 and 800 mm width. The 800 mm width cabinets can incorporate an integrated cable compartment.
- Heights available from 600 up to 2000 mm, always with a common depth of 250 mm, horizontal coupling of 2 or more cabinets possible
- Modular concept: all functional units in steps of 50mm in height
- The busbars can be assembled vertically or horizontally
- Only one type of tool is required for the assembly of the cabinets

Innovative cable entry and ease of installation

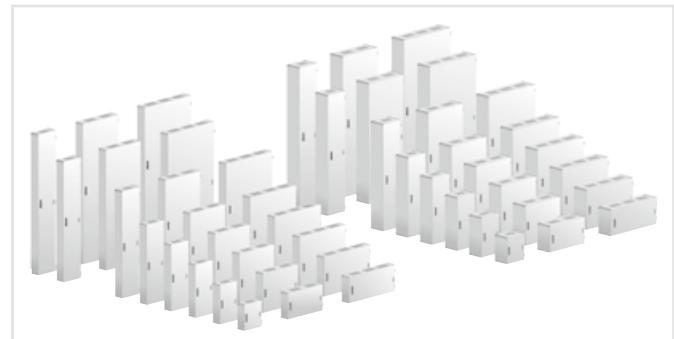

Several options provide the right solution for any kind of wiring application. System pro E® energy offers the options of cabinets with the top and bottom in different executions: plain with pre-knockouts for flanges, big opening.

The wide range of flange types provides the right solution for every application. The flanges can be attached without the need of tools. System pro E® energy offers unrestricted access during operation, expansion, maintenance and functional monitoring.

Plinth

The common plinth for System pro E® energy L and M has a height of 100 mm, and up to 3 of them can be stacked without any additional accessories.

The plinth consists of corner parts and lateral, front and back covers. Removing the front and back panels simplifies the panel's transportation and provides the required accessibility for the wiring in the final installation. The same applies to coupled cabinets, the removal of the internal lateral covers enables the cross-wiring between cabinets.

01 Complete range

02 Innovative cable entries

03 Easy assembly of plinth

04 Top and bottom cable entries

05 Easy assemble by one tool

System pro E® energy

Product benefits

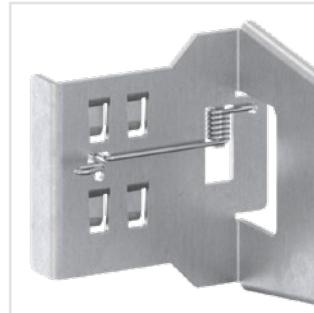

Quick to assemble

- Assembly can be done by a single person
- Tool-free snap-on system thanks to click-in supports for DIN-rails, mounting plates, busbar holders, etc.
- Pre-assembled handles with $\frac{1}{4}$ turn screws for cover plates
- System pro E® energy Combi provides a time-saving installation due the hook-in technology. This quick assembly limits the numbers of screws.
- Guiding ledges in back panel for top and side panel fixation
- Generous wiring space, enough for vertical cable ducts of 80 mm width on each side
- Markings in the fixation profiles to quickly position the functional units and cover plates
- Frame allowing the removal of all cover plates at the same time
- Innovative flange technology with tool-free installation

Door ready to mount

- Common doors for System pro E® energy L and M
- Choose between plain and transparent doors for all cabinet widths
- PUR gasket to guarantee perfect closing and the protection degree
- 3 point locking system already mounted
- Easy and quick mounting without tools
- 130° opening angle
- Handle with several inserts available to adapt to the needs of each customer individual requirements

02 Adjustable bracket

03 Removable cover

04 Pre-assembled cover locks with $\frac{1}{4}$ turn lock.

05 Steel door and glass door ready for mounting

System pro E® energy

Product benefits

Safe for users, reliable and sturdy

The combination of the System pro E® energy cabinets and ABB's low voltage devices are certified according to the standard IEC 61439-2 / -3 and IEC62208

Protection degree against dust and liquids:

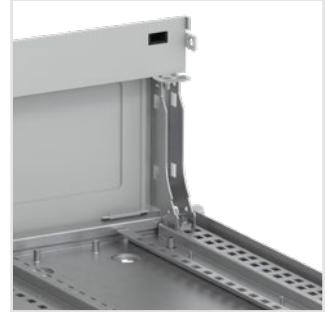

- System pro E® energy L: up to IP43
- System pro E® energy M: up to IP55

Strong mechanical construction

- Back panel galvanized sheet steel 1.5mm thick
- Internal corner parts to fasten the external panels, the frame of the cover plates and to execute the horizontal coupling of the cabinets
- Vertical profiles to fasten the mounting plates and isolator mounted at the back panel providing additional rigidity
- External panels sheet steel, powder coated
- Optional horizontal reinforcement for coupled cabinets
- Internal segregation up to Form 2b
- Tempered glass for the transparent door

01

02

— 01 Easy assembly from side-by-side

— 02 Internal corner part

System pro E® energy

Innovative cable entry

A wide range of flange types provides the right solution for every application.

System pro E® energy offers two options on the top and bottom panels to allow the panel builder and installer to customize the cabinet to the requirements of each installation. The top and bottom are available as:

- plain with the pre-knockouts for the cable flanges
- with a wide opening

All flanges can be installed without using any tool.

Membrane flange

- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- Optimal cable entry thanks to the combination of hard and soft components. Additional fixing and centering

Flange for M screw fittings

- 2-component flange with integrated seal, made of plastic
- Tool-free installation thanks to push and lock technology
- With two different hole patterns

Flange with cable sleeves

- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology

Closing flange - plastic

- 2-component flange with integrated seal, made of plastic
- Tool-free installation thanks to push and lock technology
- Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

Closing flange - sheet steel

- With foam seal around perimeter, made of 2 mm sheet steel
- Continuous protective earth connection via flange fastener
- Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

Cabinets: Back panel + Side panels

- Back panel, sendzimir zinc plated steel 1.5 mm
- Side panels, epoxy-polyester coated sheet steel 1.25 mm
- 4 internal corner parts
- Profiles to fix the functional units (mounting plates, DIN rail, busbar isolators...)
- Frame to fix the cover plates
- Required hardware

Extensions: Back panel + coupling profiles

- Back panel, sendzimir zinc plated steel 1.5 mm
- 4 internal corner parts
- Profiles to fix the functional units (mounting plate, DIN rail, busbar isolators...)
- Frame to fix the cover plates
- Coupling profiles and accessories
- Required hardware

Top & Bottom

3 different options:

- With cut outs for cable flanges
- With a wide opening to maximize the entry surface
- Plain with knock-outs for cable flanges

The kit includes 1 unit of the selected top and bottom, with all the required fixation hardware.

It's required to order 2 top & bottom per cabinet.

Plinth

- 100 mm height
- Stackable up to 3: 300 mm, without accessories
- Front, back and side covers removable
- Ease to fix to the cabinet included

Integrated cable compartment

Possible to add an integrated cable compartment in the 800mm wide cabinets

- Profiles and cover plates to build the integrated cable compartment

Interior fitting: Modular distribution panel system

- Pre-assembled quick mounting system to fix the isolators for the busbars, DIN-rails, mounting plates, covers, etc.
- See chapter for System pro E® energy Combi (page 45)

Plain or transparent doors

- 3 point locking system already mounted
- PUR gasket to guarantee perfect closing and the protection degree
- 130° opening angle
- Swing handle for 1 400 mm and higher doors
- Wide range of accessories

Plastic or metal flanges

- Wide choice of cable flanges
- Metal flanges for wide cable opening

System pro E® energy M

System overview

System pro E® energy M

System overview

Cabinets: Monoblock

- open sides
- Top: openings for flanges (400 mm) or wide opening (600 & 800 mm)
- Bottom: plain with pre-knock outs for flanges
- Included the frame for the cover plates
- Cabinet can be rotated 180°

Side panels

- Delivered in 2 units.
- Only required 1 kit per panel (combination of several cabinets coupled horizontally)

Integrated cable compartment

Possible to add an integrated cable compartment in the 800mm wide cabinets

- Profiles and coverplates to build the integrated cable compartment.

Interior fitting: functional units and busbars

Kits to fix the isolators for the busbars, the DIN rails, mounting plates...and the covers

See the chapter for System pro E® energy Combi

Plinth

- 100 mm height
- Stackable up to 3: 300 mm, without accessories
- Front, back and side covers removable
- Harder to fix to the cabinet included

Door

Plain or transparent

- Same doors for IP43 and IP55 cabinets
- 3 points locking system already mounted and PUR gasket
- Mount without tools
- 135° opening angle
- Swing handle for 1 400 mm and higher doors
- Wide range of insert as accessories

Flanges

Plastic or metal. Same for IP43 and IP55

- Several cable flanges.
- Metal flanges for wide cabel opening

Technical specifications and product features

Technical specifications

Standards / requirements	IEC 61439 -1/-2/-3* and IEC62208
Protection Class	Class I, earthed
Pollution degree	2
Segregation	Form 1 and Form 2
Degree of protection	IP55
Mechanical impact Strength	Without door IP30 IK 07 - knock outs IK 08 - without door, transparent door IK 09 - plain door, side panels
Conditions of installation	Indoor installation Ambient air temperature max. +40 °C Ambient air temperature min. -5 °C Operating temperature max. +55 °C Storage temperature max. +55 °C Storage temperature min. -40 °C
Rated current (I_{n})	800 A
Rated operationa voltage (U_{n})	415 V
Rated insulation voltage (U)	1 000 V
Rated short-circuit current (I_{ew})	32 kA/1s
Rated current of busbar systems	800 A in IP43

Product features

Housing and door	Color RAL 7035
Cabinet	Epoxy-polyester coated sheet steel 1.25 mm
Plain door	Epoxy-polyester coated sheet steel 1.25 mm
Transparent door	Epoxy-polyester coated sheet steel 1.25 mm and safety glass 3 mm thick
Cover plates	Epoxy-polyester coated sheet steel 1 mm
Door opening angle: 130°	
Doors with espagnolette closure, 3 points locking system	
Doors for wall-mounting cabinets: with latch plate and 3 mm double bit pin	
Doors for floor-standing cabinets: with swing handle and 3 mm double bit pin	
Assembly options	Prepared to be fitted with System Pro E® energy Combi modules and mounting plates
Forms of delivery	Monobloc enclosure with open sides

System pro E® energy Combi

Distribution panel system

Simple in planning

Quick in assembly

Safe in application

System pro E® energy Combi

Distribution panel system

The highly sophisticated quick mounting system from ABB makes the completion of modular cabinets with distribution panels an effortless process. Simple, quick and safe – these are the three attributes of this system that speak for themselves.

System pro E® energy facilitates internal configuration with a modular system of wall-mounting and floor-standing cabinets for the modular System pro E® combi distribution panel system.

The wide range of the System pro E® combi offers the right solution for every application. One internal configuration System for all cabinets. All of the individual parts required for assembling are packed separately and supplied in the form of a set.

The benefits: These sets allow you to take a flexible approach towards stock keeping, and avoid a time-consuming search for system parts such as brackets, screws or fastening elements. The instructions supplied with the system make assembly a child's play. Quick and clear planning and calculation become perfect with planning software "e-Configure".

Technical specification

Standard / regulations	IEC61439 -2/-3
Protection Class	I, earted
Degree of protection	IP2XC

Electrical characteristics

Rated impulse withstand voltage (U_{imp})	6kV
Overvoltage category	III
Pollution degree	3
Rated current (I_r)	up to 800 A
Rated peak withstand current (I_{pk})	up to 67 kA
Rated short-time withstand current (I_{cw}) 1.0 sec	up to 32 kA
Rated frequency (f)	50 - 60 Hz
Rated insulation voltage (U)	1000 V
Rated operation voltage	415 V

Busbar systems

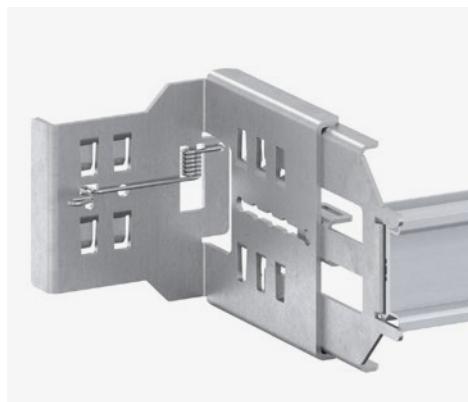

Accessories

(The Right Module for every type of application)

System pro E® energy Combi

Product benefits

One internal configuration system for all cabinets

All internal configuration and the busbar system for both systems (IP43 and IP55). The internal configuration up to 800 A.

Easy assembly / Spring mounting

- Assembly can be done by a single person
- Pre-assembled captive screws
- 1/4 turn screws for cover plates
- Click-in supports for functional units and busbar holders
- No tools needed
- Frame to remove all cover plates at once

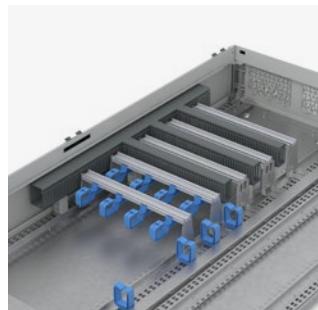

Depth adjustable DIN-rail

DIN-rail can be adjusted in five depths:

- RCD, SPD, MCD S200
- MCB S750/S800
- XT1, XT3, ATS125
- Terminal
- ATS-compact

Flexible in assembly, ease to combine

With its new mounting concept System pro E® combi provides more flexibility and access for installation and wiring. Placed horizontally on two trestles, makes the assembly and wiring very comfortable.

System pro E® energy Combi

Product benefits

Easy cover handling

Time-saving fixation and adjustment as well as the simple closure system with 1/4 turn quick-lock provides easy handling of the covers and standard earth connection. When using devices in the covers a safe earth connection is guaranteed through 6 mm² cable with ring shoes on both sides. The 90° opening angle of the hinge set ensures optimal accessibility.

Cabling / wiring solution

The support for different dimensions of wiring ducts have the same level for horizontal and vertical usage. An additional profile for stabilization of wiring duct and for mounting wire holders is available.

KITS available for all XT-breakers

Modules for moulded case circuit breaker Tmax (XT1 - XT6), 3 and 4 pole versions, in horizontal and vertical position.

KITS for ATS, TruOne

Modules for automatic transfer switch (ATS), in vertical position up to 800 A.

Optimal accessibility and ease of installation

The removable frame as standard gives the possibility to remove all covers in one handling and provides quick access.

Form of internal seperation (up to 2b)

For the busbar system behind the device area is a horizontal transparent partition available. To separate the busbar system in external cable container it is possible to use a vertical separation.

System pro E® energy Combi

Modules for moulded case circuit breaker Tmax, horizontal

QB3H62000

QB4H82000

Module for:

- Tmax breaker horizontal 3-/4-pole
- Unequipped set for ABB Tmax as an incoming or outgoing breaker

Content:

- Mounting plate of sheet steel with cut-outs
(for fixed version with level operation with front Terminals)
- Support to fix to the rear panel profiles
- Cover plate with cut-outs (3-/4- Pole) breaker
- Cover plate with 1/4 turn quick-lock

For 3 pole breakers please order accessory flange code AD3305 XT1 3P flange mounted on plate 1STQ009216A0000, AD3306 XT2 3P flange mounted on plate 1STQ009217A0000, AD3307 XT3 3P flange mounted on plate 1STQ009218A0000, AD3305 XT4 3P flange mounted on plate 1STQ009219A0000.

QB3H620RC

QB4H820RC

Module for:

- Tmax breaker horizontal 4-pole + RC
- Unequipped set for ABB Tmax as an incoming or outgoing breaker

Content:

- Mounting plate made of sheet steel with cut-outs
(for fixed version with level operation with front Terminals)
- Support to fix to the rear panel profiles
- Cover plates with cut-outs (for 4 pole breaker + RC) and 1/4 turn quick-lock

Uniclic plug-in distribution system, overview

Uniclic plug-in distribution system

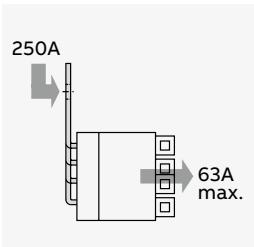

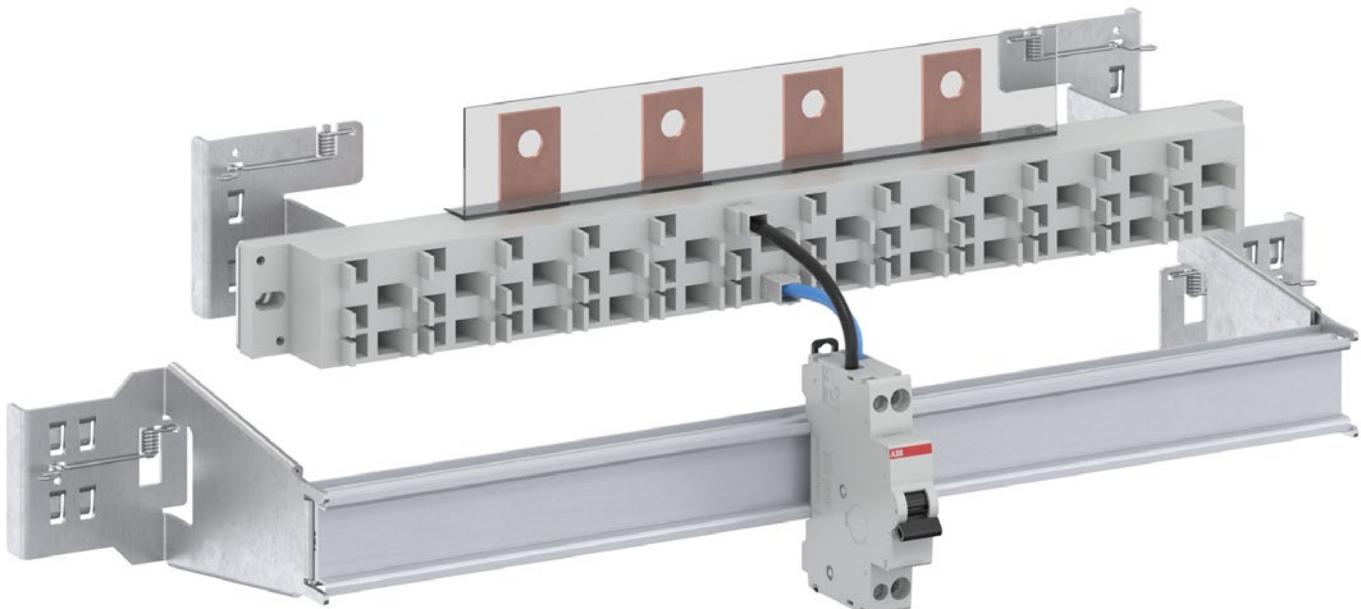

Uniclic is a secondary plug-in distribution system of 250A, 660V~ 60kA peak. Uniclic is a busbar for modular devices such as MCBs as for comfort functions.

Uniclic can be positioned between the DIN-rails, independent the type of system enclosure: System pro E energy, TwinLine N, System pro E power and others.

The main advantage of Uniclic is the safety aspect (IP20): adding or removing electrical circuits in a panel board

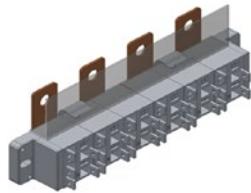

without disconnecting the power. All outgoing circuits stay in the operational function, due to the fact that all operations are done using the insulated click connection, without touching the live parts, not even when using an insulated tool.

The Uniclic distribution system is suitable for integration in all system enclosures conform to IEC 60439-1.

System pro E® energy Combi

Uniclic plug-in distribution system

Material:

- Connecting Lugs, copper, uncoated
- Housing / Body, PC+PU resin, grey
- Protective Profile, PVC, clear
- Nominal Voltage, 400 V
- Nominal Current, 250 A
- I_{cw} (1 sec.) 10kA / I_{pk} 61kA
- Degree of protection IP20

Transport by Crane

—
Lifting of the System pro E[®] energy is possible as indicated. Always use the ABB transportation lugs type ESAC3006P4 and for side-by-side structures lifting, use the reinforcement. Also consider the weight limits of the cabinets.

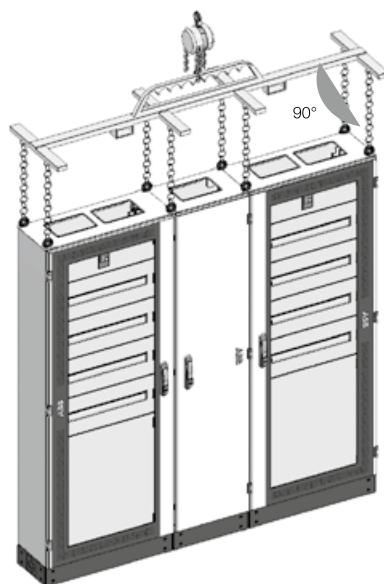

max. 150 kg

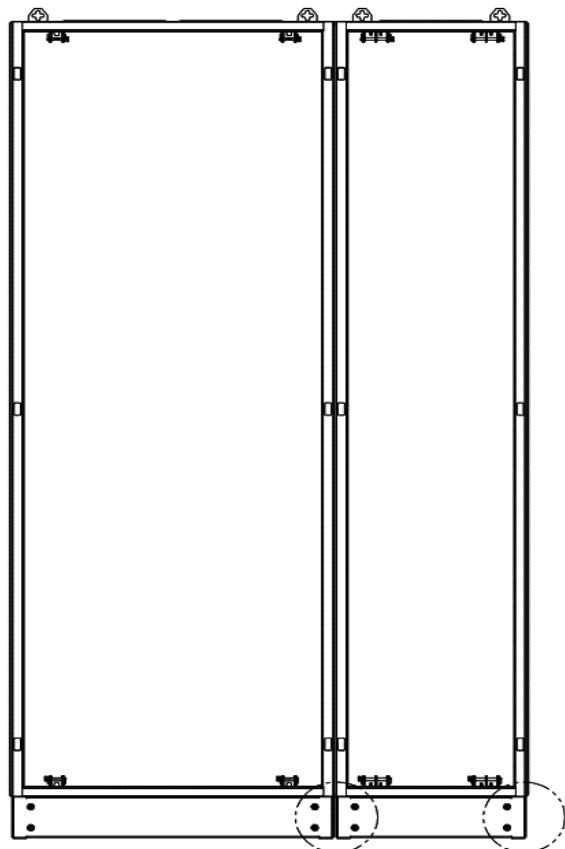

max. 180 kg

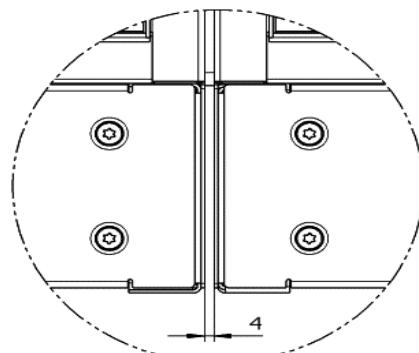

max. 420 kg

System pro E® energy L and M

Specifications for tender documents

Modular platform for Low Voltage distribution boards up to 800 A

Conformity to standards

The distribution boards are designed according to the IEC 61439-2/-3 standard. All verification tests and individual tests required by the standard have been done.

Internal segregation form is Form 1. Form 2b can be achieved, as option.

Technical characteristics

The panel is designed of kit-form cabinets, for the IP43 version, or monobloc welded cabinets, for the IP55 version, made from sheet steel, which can be stand alone or coupled next to each other, for indoor use.

Each cabinet, for the IP43 version, consists of a high-strength rear plate, made of galvanized sheet steel 1,5 mm thick, with four corner parts bolted in each corner. The external panels and the doors are made in epoxy polyester power coating sheet steel 1.2mm thick. All the external panels (top, bottom and side panels) are fixed, using screws, to the sheet steel corner parts. Each one can be disassembled independently from the rest of the external panels. The sheet steel parts are pre-treated with iron phosphate and protected with epoxy polyester powder coating RAL7035, giving a light texturized finish. The colour for the handle and the base is RAL 7012.

For the IP55 version, the cabinet consist of a monobloc structure build with a high-strength rear plate, made of galvanized sheet steel 1,5 mm thick; the top and bottom plates and the open sides welded. The external side panels are fixed with screws to the monobloc structure guaranteeing the degree of protection IP55.

The range of System pro E® energy consists of 24 different sizes:

- Three external widths: 385, 600 and 817 mm
- Eight heights: external dimensions from 649 up to 2049 mm.
- One depth: 250 mm with the door
- Useful dimensions:
 - Widths for 12, 24 and 36 modules 18mm. The cabinet of 36 modules can be configured as 24 modules plus an internal cable compartment
 - Heights from 600 up to 2 000 mm

The DIN rails or mounting plates of the functional units, and the busbar holders are fixed with special “click-in” support, attaching to the vertical profiles which are fixed to the rear panel. System pro E® energy allows free accessibility from all sides for the wiring of electrical devices mounted on the DIN rails and mounting plates, fixed to the rear panel on the functional kits.

The functional units, based on a modular concept with a height in steps of 50 mm are available for:

- DIN devices, for 12, 24 and 36 modules of 18mm. In two different distances between DIN rails, 150 and 200 mm. One special DIN rail adjustable in depth to allow the assembly of the following devices S200, OT160G, S750, S800, XT1, XT3
- Meters
- Push-buttons
- Molded case circuit breakers. Up to 800 A. To mount in horizontal or in vertical position. For one single MCB or several of them in the same mounting plate.
- Load break switches. Up to 800 A. To mount in horizontal or in vertical position.
- Automatic Transfer Switches
- Terminals
- Plain mounting plates

Two busbar systems can be mounted in the cabinets:

- Staircase busbar. Developed for easy accessibility during wiring to the four phases, because the holder shape puts the copper bars at different depths. The staircase busbar can be assembled in vertical position in the 400mm wide cabinet and in the internal cable compartment, in the 800mm wide cabinet; and in horizontal position in the 600 and 800 mm wide cabinets. Electrical devices cannot be mounted in front of a staircase busbar. The busbar holders are fixed to the rear panel using specific “click in” supports and profiles.
- Linear mounted busbar. It Allows the assembly of the copper bars between the rear panel and the electrical devices. The rear busbar can be mounted in vertical or in horizontal position in all types of cabinets, except in the internal cable compartment. The electrical devices can be mounted in front of the rear busbar in the 600 and 800 mm wide cabinets, except some MCCB's and OT's.
- Both busbar configurations, staircase and linear, can be executed with standard rectangular cross section copper bars, or special shaped copper bars.

Vertical and horizontal separation screens allow the upgrade of the internal segregation form to Form 2b, according the IEC 61439-2

The cabinets can be closed with two types of doors, plain and transparent. Both types available for all the heights and widths. The doors are mounted with a three-point locking system, operated by a central handle in the doors of a height of 1400 mm or higher. The door can be assembled and disassembled without any tools, and can be opened from the right or the left side of the enclosure. The opening angle is 135°. The door includes a PUR gasket, and it's common for the complete platform: System pro E® energy L and System pro E® energy M.

System pro E[®] energy L and M

Specifications for tender documents

System por E[®] energy, with the ABB Low voltage devices,
is certified according IEC 61439-2/-3 by DEKRA.

Electrical characteristics

Protection class: Class I, earthed

Pollution degree: 2

Segregation: Form 1 and Form 2b

Rated operational voltage: 690 V

Rated insulation voltage: 1 000 V

Rated short-circuit current: 32 kA/1s

Rated busbar current system: up to 800 A

Protection degree:

System pro E[®] energy L: IP43 with door and IP30 without door

System pro E[®] energy M: IP55 with door and IP30 without door

The panel is designed for indoor use only

Ambient temperature: 35 °C
